EDUCATION

• Sahyadri college of Engineering and Management, Adyar

Nov 2021 - May 2025

Bachelor of Engineering - Computer Science and Engineering (Data Science)

EXPERIENCE

• InUnity - Innovation for Community

Jan 2025 - Present

Research and Product Development Intern

Mangalore

- Conducted end-to-end market analysis on the project **Mantrika.ai** with 50 competitor platforms and synthesizing findings into a comparative report that positioned Mantrika.ai's competitive edge.
- Collaborated with cross-functional teams to finalize the website design using figma, perform necessary adjustments, and ensure smooth delivery aligned with client expectations.
- Performed WordPress implementation and managed feedback loops through to the live launch of the Mantrika.ai website.

• CoE Digital Forensics Intelligence and Cyber Security

Oct 2023 - Nov 2023

Data Science Intern

Mangalore

- Developed and validated a classification model on 100,000+ transaction records using Python and advanced ML algorithms to detect fraudulent activity with 97% accuracy.
- Executed comprehensive data cleaning, preprocessing, data visualizations and feature-engineering workflows, using statistical techniques to enhance data analysis efficiency.
- Demonstrated data-driven decision-making for evaluating investment opportunities based on market trends.

PERSONAL PROJECTS

• Detection of Parkinson's Disease using Deep Learning Models

2024

Developed a CNN-based Parkinson's detection model using real-time MRI scans, achieving 88.19% accuracy.

- Tools & technologies: Python, NumPy, Seaborn, Matplotlib, Keras, OpenCV, Flask, HTML, CSS, JavaScript.
- Conducted a comparative evaluation of five pre-trained CNN models to identify the best model based on the performance metrics, and deployed the selected model via Flask for stakeholder validation.
- Designed the end-to-end system designs using Miro and documented the project workflow extensively to aid transparency and replication, showcasing strong organizational skills.

• ResqueNet - Crowd Disaster Management

2024

Developed a real-time disaster relief platform for SAP Hackfest 2024

- Tools & technologies: Excel, SQL, HTML, CSS, JavaScript, Leaflet, Flask, Android Studio,
- Led the team and designed the end-to-end workflow using Miro for ResqueNet, coordinating the development of two mobile apps, a web management platform, and a server system to enable real-time disaster aid coordination.
- Led cross-functional collaboration by assigning tasks across teams using Jira (Agile), ensuring integration of core features like real-time request submission, location-based tracking, dynamic NGO dashboards, and emergency request handling through the server.

TECHNICAL SKILLS AND INTERESTS

Languages & Frameworks: Python, SQL, Data Cleaning (Pandas, NumPy), Data Visualization & Analytics (Seaborn, Matplotlib, Google Analytics), Sklearn

Tools: Excel, Miro, Git and GitHub, Jira (Agile), WordPress

Soft Skills: Storytelling, Effective Communication, Self-motivated, Team work, Leadership, Creative Thinking

CERTIFICATIONS

• Foundations: Data, Data, Everywhere - Google

2024

• Introduction to Data Analytics - Simplilearn

2024

• Business Analytics with Excel- Simplilearn

2024
