EDUCATION

• Sahyadri college of Engineering and Management, Mangalore

Nov 2021 - May 2025

Bachelor of Engineering - Computer Science and Engineering (Data Science)

EXPERIENCE

• InUnity - Innovation for Community

Jan 2025 - May 2025

Research and Development Intern

Mangalore

- Developed and hosted the client-facing interface for the project **Mantrika.ai**
- Collaborating with cross-functional teams and ensured that deliverables were aligned between design, and client engagement teams.
- Collaborated with designers to develop the website, conducted competitor research, and maintained clear documentation.

• CoE Digital Forensics Intelligence and Cyber Security

Oct 2023 - Nov 2023

Data Science Intern

Mangalore

- Developed a sophisticated Classification model by analyzing 1,00,000 data points to accurately identify fraudulent transactions using advanced Machine Learning algorithms achieving 97% accuracy.
- Executed comprehensive data cleaning, preprocessing, and manipulation tasks, leveraging Python statistical techniques to enhance data analysis efficiency.

PERSONAL PROJECTS

• Detection of Parkinson's Disease using Deep Learning Models

2024

Developed a CNN-based Parkinson's detection model using real-time MRI scans, achieving 88.19% accuracy.

- Tools & technologies: Python, Statistics, Flask, HTML, CSS, JavaScript, Machine Learning Algorithms
- Conducted a comparative evaluation of five pre-trained CNN models to identify the optimal architecture based on the performance metrics, and deployed the selected model via Flask for stakeholder validation.

• ResqueNet - Crowd Disaster Management

2024

Developed a real-time disaster relief platform for SAP Hackfest 2024

- Tools & technologies: Python, JavaScript, Flask, Excel, Android Studio
- Through this hackfest that lasted for about a month, I came out of my comfort zone and lead the team while enhancing skills in Python, JavaScript, leadership, and team collaboration and advanced to the final round with a smart, data-driven solution for efficient aid delivery and resource matching in emergencies.

• Restaurant Management System

2024

Developed a web-based restaurant management system for efficient dine-in operations.

- Tools & technologies: SQL, Flask, HTML, CSS, JavaScript
- Integrated process and operational improvements in the system design to support efficient management and order tracking.

TECHNICAL SKILLS AND INTERESTS

Languages and Frameworks: Python, SQL, C, HTML, Cascading Style Sheets (CSS)

Tools: VS Code, Miro, Git and GitHub, Jira (Agile), Excel, WordPress, Canva, Google docs, Figma

Operating Systems: Windows, Linux

Soft Skills: Storytelling, Reading, Effective Communication, Attention to Detail, Self-motivated, Team work, Leadership, Creative Thinking, Critical Thinking

Interests: Software Development, Project Management, Research

CERTIFICATIONS

• Connect and Protect: Networks and Network Security - Google

2024

• The AWS Technical Essentials - AWS | Simplilearn

2024

• Foundations of Cybersecurity - Google

2024

• Google Cloud Computing Foundations and Generative AI - Google Cloud

2023
